Air-conditioner
Compressor

EU7512
EU6816Q1

Grille

EU6832M
EU6881Q1
EU6816Q1

Automotive/MCU

EU6816Q1/EU6815Q1

Advantages

High integration, simple development and high stability

Package

EU6816Q1 : QFN48 (6x6 mm)
EU6815Q1 : QFN48 (6x6 mm)

Application

Relayed control for car window brush motor High-voltage compressor

EU6866Q1/EU6865Q1

Advantages

max voltage 180v, 6N pre-driver integrated, built-in LIN transceiver, CAN decoding, various control algorithms for brushless motors, including flux weakening, HFI, resonance suppression etc

Package

EU6866Q1 : QFN56 (7x7 mm)
EU6865Q1 : QFN56 (7x7 mm)

Application

High power water pump Blower
Oil pump Seat motor
Electrical fan Rotational screen

EU6881Q1

Advantages

Fully integrated IC, built-in LIN transceiver, ALL in ONE MCU, 6.5V-20V, max current 1A Integrated EEPROM 2K bits, sensorless FOC. 6N, vds protect,

Package

EU6881Q1 : QFN40 (5x5 mm)

Application

Car seat fan AGS
Cooling fan Air-conditioner outlet
Heat management valve Charging port

EU7512Q1

Advantages

RISC-V +single/dual ME core;
Single/dual foc control
Sunroof, aircon, trunk door, compressor.
LIN 2.X, CAN protocol
1x LIN2.21x CAN2.01x CAN FD2x UART2x SPIx
I2CDMA64k Flash with ECC, Supports PFC

Package

EU7512Q1 : LQFP64 (10x10 mm)

Application

sunroof Seat rail
Air-conditioner compressor

Automotive/ASIC

ET8215Q1

Advantages

All in One ASIC, max voltage 20V, max current 1A sensorless FOC.
Applicable for several mini fans Fully integrated ASIC with built-in MOSFET, high integration, few peripheral circuits; FOC mode, low noise, high efficiency; to use.

Package

ET8215Q1 : QFN24 (4x4 mm)

Application

Seat fan Cooling fan

ET8161N

Advantages

Free dedicated BootLoader, and simplified structure and development of the domain controller. Only one MCU is needed to control the ASIC chip to drive the motor

Package

ET8161N : QFN32 (4x4 mm)

Application

Thermal management domain controller

Water pump driver
